Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period **will** apply and **will** expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply **will**, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-2, 4-6 are rejected under 35 U.S.C. § 103(a) as being unpatentable over WO 03/098025 (Alderson et al) in view of U.S. 4249377 (Bratt et al). Alderson et al discloses a Stirling engine 1 having a head 2, a burner 7, a flexible seal 20 seals the interface between the engine and the burner, fins 8. Alderson et al does not disclose a thermocouple having a thermocouple housing having one opening outside the combustion chamber, and the thermocouple in the thermocouple housing extending from a location adjacent to the head out of the opening in the thermocouple housing. Bratt et al is relied upon to disclose a thermocouple 7 having a thermocouple housing (tube 2) having one opening outside the combustion chamber (7 is not in the combustion chamber because it's protected by tube 8), and the thermocouple in the thermocouple housing extending from a location adjacent to the head out of the opening in the thermocouple housing. It would have been obvious at the time the invention was made to a person having ordinary skill in the art to provide a thermocouple with thermocouple housing in Alderson et al as taught by Bratt et al for the purpose of detecting the temperatures at that specific location.

Art Unit: 3748

Claims 3, 7-8 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Webber, Kamen et al, Naito and Simpson et al disclose Stirling engines comprising thermocouples.

Any inquiry concerning this communication or earlier communications from the Examiner should be directed to Examiner Nguyen whose telephone number is (571) 272-4861. The examiner can normally be reached on Tuesday--Friday from 12:30 AM to 10:00 PM.
